UNTOUCHABLE

Double Glazed

The Product : Integrated Magnetic Cordless Blind

Type : Untouchable

Purpose : Internal Sun Shading System

Fabrics : Pleated Or Cellular

UNTOUCHABLE is a blind system integrated into a double glazed unit

Cordless magnetic blinds system is designed for simple installation between two insulated window panes - in 20 mm cavity, and easy handling – lifting and lowering of pleated and cellular fabrics.

System is operated through a link between inner and external magnets by sliding the handles up or down.

The mechanism consist of 8 components and the fabrics. There are no moving parts and there are no mechanical linkages. Maintenance does not exist, as well as cleaning.

Untouchable system is designed for a long life. At the end it is easy for recycling, with one advantage - the magnets can be reused in new blinds, and the other aluminium and polyester components can be simply and cleanly separated for recycling.

Specification

Spacebar : 20mm alu structure with integrated guide rail

Fabric : 14-16mm pleated or cellular structure fabric

Glass : Fits 31mm double glazed unit(min) interior side glass thickness 4 mm

$$\left(\begin{array}{l} \text{Inside} + \text{Air Gap} + \text{Outside} \\ 4 \text{ mm} + 20 \text{ mm} + * \text{ Any Thickness} \end{array} \right)$$

**As allowed by section series*

Parallel motion exterior handles magnetic coupling between handle and fabric support

Benefits

- Discrete and stylish - does not intrude into the room
- Operation can be in any direction: top-down or bottom up, left to right or right to left
- Blackout, dim-out and screen fabrics are a available
- Position the blind anywhere - eliminate glare without cutting out light
- Sealed away for life - no blind cleaning or maintenance
- No cords - Truly child friendly
